Résumé	The Great American Recession resulted in the loss of eight million jobs between 2007 and 2009. More than four million homes were lost to foreclosures. Is it a coincidence that the United States witnessed a dramatic rise in household debt in the years before the recession - that the total amount of debt for American households doubled between 2000 and 2007 to \$14 trillion? Definitely not. Armed with clear and powerful evidence, Atif Mian and Amir Sufi reveal in 'House of Debt' how the Great Recession and Great Depression, as well as the current economic malaise in Europe, were caused by a large run-up in household debt followed by a significantly large drop in household spending.

Abstract	Manuel international de référence adopté par de nombreux établissements prestigieux, cet ouvrage présente la finance d'entreprise en utilisant la Loi du prix unique comme fil conducteur. Des va-et-vient systématiques sont faits entre la théorie et la pratique pour présenter la finance d'entreprise dans toute sa diversité. L'accent est mis sur la « façon de penser » des financiers, illustrée par une quinzaine d'entretiens avec des professionnels de la finance. Des encadrés « Erreur à éviter » signalent les erreurs les plus fréquentes qui peuvent découler de l'incompréhension des concepts financiers, et une vingtaine d'autres sont consacrés à l'utilisation pratique d'Excel.
